Professional Aquatic Weed Control Services

May 19, 2017

Dear Red Lake Riparian Property Owner,

The intent of this letter is to notify you that in cooperation with Red Lake Association and the WDNR, Northern Aquatic Services (NAS), an herbicide application company, has been hired to chemically treat the nuisance exotic aquatic vegetation Eurasian watermilfoil (EWM) in Red Lake in 2017 according to a EWM management plan drawn up by the WDNR. In accordance with that plan, the EWM treatment will cover approximately 4.11 acres in four beds (see map). The 4.11 acres is indicated by the areas in red. The herbicide used will either be Reward or Tribune (both with the active ingredient "diquat") applied at a maximum label rate of 2-gallons/acre. Any water usage restrictions for the treated area will be posted on yellow signs at the landing and on properties near the treatment areas. The 4.11-acre treatment will likely occur between May 22 and May 25, 2017. **A copy of the permit application is available at the following link: <http://www.redlakeassociation.org/>**

If you have any questions you may contact Northern Aquatic Services at 715-755-3507, Wisconsin DNR Lake Biologist Mark Sundeen at 715-635-4074, or Dave Blumer, Lake Education and Planning Services at 715-642-0635. Chemical fact sheets are available upon request or at <http://dnr.wi.gov/lakes/plants/>.

Sincerely,
Dale Dressel
Northern Aquatic Services
